7. The following is an examiner's statement of reasons for allowance: Applicant's claimed invention discloses a method for managing access to devices using certificates to authenticate a second device to a first device. The prior art of record, Schneier, teaches or suggests a similar invention. However, Schneier does not teach nor suggest the steps of: in response to authenticating the second device using a digital certificate encrypted with a first private key of the second device and a first encrypted message using a second private key of the second device, encrypting the first message using a public key related to the second private key of the second device to generate a second

encrypted message and sending data indicative of the second encrypted message to the second device. Hence, claims 7-10, 21 and 22 are allowed.
